2-BUTTON APARTMENT STATION

APPLICATION

The IR102C (IR-102C) Suite Station allows the tenant to press a button to talk and then release the same button to listen. This eliminates the necessity of pressing one button to talk and another button to listen.

The station automatically shuts off a few seconds after conversation is completed, or as soon as the door button is pressed. The IR102C is not a voice/noise activated intercom station and does not require a complex and costly amplifier.

FEATURES

• One combination **TALK/LISTEN** button

• Eliminates two-button talk/listen operation

• Uses standard amplifier power pack

• English text, international symbols and Braille

SPECIFICATIONS

Dimensions: Height: 6.875" (174.6 mm)
Width: 5" (127 mm)
Depth: 1.5" (38.1 mm)
Projects: 1" (25.4 mm) from mounting surface
