AREA-OF-RESCUE REMOTE CALL STATIONS

APPLICATION

Used with TekTone®'s Tek-SAFE® NC150R Area of Rescue Assistance System, IR150SS-series Remote Call Stations provide efficient communication between areas of rescue assistance (in protected stairwells) and the building lobby. IR150SS-series Remote Call Stations are located in areas of rescue assistance to provide two-way hands-free communication to a central location from which help may be summoned. Calls are placed by pressing a large, red momentary push button. Solid state indicators on the panel indicate when a call has been placed and when the intercom is in use.

• **IR150SS** (IR-150SS) is a flush mount station with a large mushroom style push button. Use flush mount housing OH-600.

• **IR150SS/S** (IR-150SS/S) is a surface mount station with a large mushroom-style push button.

• **IR150SSF** (IR-150SSF) is a flush mount station with a large low profile push button. Use flush mount housing OH-600.

• **IR150SS/SF** (IR-150SS/SF) is a surface mount station with a large low-profile push button.

IR150SS (IR-150SS) Flush Mushroom Button Type
Not Shown: Surface Mount IR150SS/S (IR-150SS/S)
